Primary Examiner, Art Unit 2629

1. **Status:** Please all the replies and correspondence should be addressed to Examiner's new art unit 2629. Receipt is acknowledged of papers submitted on 02-13-2008 under request for reconsideration, which have been placed of record in the file. Claims 1-19, 21-32 and 34 are pending in this action. Claims 20 and 33 are cancelled.

***Response to Amendment***

2. Claims 1-19, 21-27, 32 and 34 were allowed in previous office action. Applicant arguments filed on 02-13-2008, under remark regarding allowable limitations "applying a setup pulse for forming a first space charge at a selected discharge cell to the discharge cell; and establishing the first space charge formed by the setup pulse as a priming element, and applying a sustain pulse to the discharge cell, wherein the sustain pulse has a voltage level of a range for discharging the selected discharge cell when the priming element exists in the selected discharge cell" are persuasive; therefore the prior art rejection mailed on 11-26-2007 is withdrawn; and after further extensive search and consideration the prior art cited on 892's fails to recite or disclose above allowable limitations, which puts application number 10796225 in condition for allowance.

***Allowable Subject Matter***

3. Claims 1-19, 21-32 and 34 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Applicant's arguments filed on 02-13-2008 are convincing. As argued by applicant in remarks under claim rejection regarding claims 28-31, pages 11 and 12 the prior art of the prior art of Higashino et al. (US 7,030,839 B2), Okada Taku ((US 2002/0033677 A1), Homma (US 2003/0141824 A1), Tokunaga Tsutomu et al. (US 6,900,782 B2), Seguin, Alexis (US 2004/0027317 A1); Matsumoto; Sadayuki et al.(US 5,854,540 A) fails to recite or disclose the uniquely distinct features of the independent claims limitations below with all the other limitations recited in independent claims:

**applying a setup pulse for forming a first space charge at a selected discharge cell to the discharge cell; and establishing the first space charge formed by the setup pulse as a priming element, and applying a sustain pulse to the discharge cell, wherein the sustain pulse has a voltage level of a range for discharging the selected discharge cell when the priming element exists in the selected discharge cell.**

Claims 1-19 and 21-27 are allowed.

Applicant's arguments filed on 05-24-2007 are convincing. As argued by applicant in remarks under claim rejection regarding claims 1-19 and 21-27, pages 11, 12 and page 13, last two paragraphs and page 14 the prior art of Higashino et al. (US 7,030,839 B2), Okada Taku ((US 2002/0033677 A1), Homma (US 2003/0141824 A1), Tokunaga Tsutomu et al. (US 6,900,782 B2), Seguin, Alexis (US 2004/0027317 A1); Matsumoto; Sadayuki et al.(US 5,854,540 A) fails to recite or disclose the uniquely distinct features of the independent claims limitations below with all the other limitations recited in independent claims:

a single subfield includes an address period for forming wall charges at a discharge cell to be selected from among the discharge cells, and a sustain period for discharging the selected cell, the method comprising: in the sustain period: applying a first pulse to a second electrode of the plurality of second electrodes while a first electrode of the plurality of first electrodes is established at a first voltage; and alternately applying to the first electrodes and the second electrodes a sustain pulse with a second voltage defined by a voltage difference between the first electrodes and the second electrodes, wherein the second voltage is less than a voltage difference between the first pulse and the first voltage.

Claims 32 and 34 allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's arguments filed on 10-05-2007 are convincing. As argued by applicant in remarks under claim rejection regarding claims 32 and 34; pages 11,12 and page 13, last two paragraphs and page 14 the prior art of Makino (US 2002/0067127 A1).fails to recite or disclose the uniquely distinct features of the independent claims limitations below with all the other limitations recited in independent claims:

wherein to maximize an efficacy of the plasma display panel a frequency of the sustain pulse supplied for sustaining the discharge cell in the driving circuit is greater than 500KHz and less than or equal to 1MHz due to electromagnetic interference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
